# ALTA MINES' TRANSPORTATION

Scheme to Give Camp Facilities So Badly Needed Is Fully Worked Out.

RAILWAY - TRAM COMBINE

MINE OPERATORS AND LOCAL TALENT JOIN UNITY.

of aerial tramway and broad-guage railroad is to furnish the relief the district has so long needed and the present season will see the entire system in full operation. It has taken W. J. Robinson president of the Unity Mines company successor to the Continental companies just ten days to round out the scheme and he returns to New York today to ad vise his company of what has been accomplished. This is the most important piece of real news in the local mining world that has been released in many

#### Means Boom for Alta.

It is given out by Mr. Robinson himself and is therefore authentic and true It means a boom for Alta. It means It means a boom for Alta. It means that all companies operating in the camp can now get down to business, safe in the assurance that a modest cost of transportation will be available to each and all of them, as the transportation company proposes to place its facilities at the disposal of every company and individual that has business to offer it. It means that it will be possible to ship ores out and supplies in at all seasons of the year, for the aerial tram system is to be brought up to a stage of efficiency and power to resist the avalanches of snow that tumble down the mountain sides at certain seasons, thus making its steady operation sure. steady operation sure.

#### Local Talent Takes a Hand.

"The transportation company," said Mr. Robinson yesterday afternoon, "is to operate independently of the Unity Mines company, just as was intended by the old management of the Continental companies. While the Unity company will be a prominent factor in its control, I want to say that some of the biggest and best operators in the camp, together with prominent local business and railroad interests have gone into the proposition in a liberal fashion and in a spirit of earnestness that shows their faith in the wonderfully rich district and its future. wonderfully rich district and its future.

#### Ropeway Expert at Camp.

"Contracts have been signed up with the Columbus Consolidated, City Rocks and other companies operating in the district which already guarantees a daily shipment over the tram of more tha 200 tons of ore. E. C. Ribblett, of th Ribblett Tramway company, and Leschen Rope company of St. Louis, is now at camp with Manager Harry A. Lee of the Unity Mines company, going over the present line of tramway planning for its reconstruction and improvement. One thing has already been decided. That is that the kinks and elbows shall be taken out and the line made to run on a tangent. We have contracted to have the present line in shape to handle ore by the 15th day of May between the City Rocks and Tanner's Flat terminals.

### Tramway and Railroad Meet.

"Just as soon as possible a new line of tramway will be constructed between Tanner's and Wasatch, at the mouth of Little Cottonwood canyon, where connec-tion will be made with the rehabilitated line of the Rio Grande Western between Sandy and that point. While the new tram is being constructed, new ties and new rails will be laid on the grade from new falls will be laid on the grade from Sandy to Wasatch and the entire system will, we expect, be ready for business by early in the fall, this depending on the promptness with which materials and equipment are delivered after the plac-

Mr. Robinson is highly pleased with the manner in which he has been able to round out the transportation scheme, company, as well as other operators in the district. He will be out this way again during the next month or two.

#### ELY CONSOLIDATED HAS THREE HOISTS RUNNING

At the properties of the Ely Consoli-dated company, at Ely, Nevada, the trials and tribulations incident to a winter cam-paign of equipment and development are now at an end. Manager Olaus Jeldness reports that after all birds of the second

and with a great deal of other preliminary work out of the way, Manager Jeldness states that easy sailing is ahead for the M. S. Hanauer.

remainder of this year.

Market Shows Effects of Apathy.

The local share market is simply drifting. The public is practically out of the game and its apathy is reflected in the small amount of real business transacted. Local banks discontinue overdraft privileges entirely on Monday next and the probabilities are that realizing sales will force the market lower than it is at present. It is believed, however, that most stocks are now in strong hands and there is no danger of an unloading. There will be less margin trading in the future, as a result of the banks' actions and the tone of the market will gradually strengthen, it is believed, as a result. The eastern situation is gradually clearing and during the coming month the best posted brokers opine that Salt Lake will see a great revival in the mining stock market. The public is practically out of the

The transportation problem for the camp of Alta is solved. A combination of aerial transportation problem for the camp of Salta is solved. A combination of aerial transportation and proad-guage rail-

# MINING STOCK EXCHANGE. BINGHAM DEAL

Combine of Standard and Central Companies Subject of Letters to Shareholders.

EXTENT COALATED HOLDING

GLIMPSE AT DEVELOPMENT AND a spur track to the property. EQUIPMENT.

Two important letters to shareholders in the Bingham Standard Copper company went into the mails lest night. One is a went into the mails last night. One is a full and complete statement of the agreement entered into with the Bingham Cenral company for a consolidation or coali on of the two companies, particulars of hich were given in this department sev ral days ago.

The second enclosure goes into detail oncerning the reasons why the deal was concerning the reasons why the deal was made and is intended to point out the advantages that such consolidation or coalition will give to the shareholders of the Bingham Standard Copper company. The statement mentioned covers three closely printed letter pages, and, taken in its entirety, makes it plain that the combined mines must soon occupy a prominent place in the ranks of the big producers of Bingham. In order that the general reader may get an understanding of what these properties are and what they are going to amount to, the following paragraphs are taken from the statement:

#### Properties and Equipment.

Properties and Equipment.

"The Bingham Central Mining company was about 190 acres of very desirable patented ground; has substantial equipment of buildings and machinery; approximately 9,000 feet of development work by which its properties are being opened up at depth to develop the ore bodies from which considerable quantities of ore were extracted at shallower depths a number of years ago. Some of these ore bodies have been penetrated and considerable quantities of ore developed, which will be available for profitable extraction when more favorable transportation facilities are at hand. re at hand. "The Bingham Standard Copper com-

any owns about 120 acres of ground ad-oining the Bingham Central properties on hree sides. The patented ground belong-ng to the Standard company is about qual in area to that of the Central com-pany. The Standard company has work-ngs on its various claims to the aggre-rate extent of several thousand test. ate extent of several thousand teet. Most f these workings consist of shallow tun-els driven several years ago, from which

nels driven several years ago, from which a combined production of over \$500,000 is estimated to have been realized.

"The properties of these two companies, when combined, it is believed, will make one of the greatest producing mines in Bingham camp. The mining property thus held will consist of one single group of approximately 510 acres, bounded on the west by the properties of the Bingham and New Haven Copper and Gold Mining company, and the the Utah Consolidated Mining company; on the north by the Boston Consolidated Mining company, and on the east by the United States Mining company and Last Chance group, thus leaving only the southerly end which is not directly in contact with developed and producing mines. The location of this territory with respect to these surrounding mines, the record of production from earlier workings in both the Central and Standard properties, and the developments ing mines, the record of production from earlier workings in both the Central and Standard properties, and the developments recently made, justify the belief amounting practically to an assurance that ore todies will be developed within this territory equal to those in the adjoining and more thoroughly developed ground of its prominent neighbors.

"The Central company owns an electrically operated air compressor of a capacity

ally operated air company owns an electrically operated air compressor of a capacity sufficient for five to seven machine drills; substantial buildings, office and superintendent's residences; all its tunnels and workings are piped for air in a substantial way with pipe of ample size; its tunnels are laid with heavy rail; it has complete equipment of air receivers machine drills. equipment of air receivers, machine drills, ore cars and all the usual necessary appliances for proper mining, including two blacksmith shops with full equipment.

### Development of Mines.

"The Mountain Mayd tunnel, belonging to the Central company, is located about 500 feet south from the Jeff Davis tunnel. It has a length of about 500 feet in a westerly direction toward the Julia S. group, belonging to the Standard company. Good values in both lead and copper ores have been found in these workings, though no considerable bodies have

per ofes have been found in these workings, though no considerable bodies have yet been developed.

"The Whitley is the longest working tunnel of the Central company. It starts on the Wide West No. 2 claim, and runs in a southerly direction 2,000 feet. This tunnel is primarily to develop at depth the discovered by the starts of the starts. rissures showing ore bodies of considerable size in the lime of the old workings of the Elephant and Apex claim

paign of equipment and development are now at an end. Manager Olaus Jeldness reports that, after all kinds of trouble, due to storms and bad roads, following a six weeks' delay in getting the plant delivered at camp. The new twenty-five horse power hoisting machinery at the Zack shaft is in commission and has been doing good work for nearly a week. At the date of writing this shaft had attained a depth of 33 feet and the bottom was in a perous reddish porphyry, highly copper stained, and indicating the near approach.

Very little headway was made in the Brilliant shaft during the past few days, owing to a necessary overhauling of the Brilliant shaft during the past few days. Or of for another 20 feet without a stop. The shaft is now about 400 feet deep and the last 100 feet, nearly, has been in the copper sulphdes.

The American shaft, which is splendidly equipped with a powerful hoist, was 489 feet deep when Manager Jeldness report was sent in. The bottom is in white lime and no change is immedizely availaged.

The American shaft, which is splendidly equipped with a powerful hoist, was 489 feet deep man and on change is immedizely articipated, though the characteristics of the formation are just what has been anticipated.

With the three main shafts on the property and each of the property and the carload of ore taken out in ding development work, has just been workings are golong to one of this city is a heavy owner. Mr. The Jeff Davis tunnel and its adjacent workings are golong considered with a powerful hoist, was 489 feet deep when Manager Jeldness report was sent in. The bottom is in white lime and no change is immedizely articipated. With the hree main shafts on the property in the carload of ore taken out in doing development work, has just been workings are golong to the colon of the cloud of ore taken out in doing development work, has just been workings are golong to the colon of the cloud the property in the colon of the c workings are 100 feet or more under the surface, so that at this point, we have a depth of nearly 300 feet on these large bodies of sulphide."

#### DOINGS OF UNLISTED STOCKS ON EXCHANGE

There was very little real trading in There was very little real trading in unlisted stocks yesterday. As on the day previous, buyers made the prices in a majority of cases, but aside from the opportunity occasionally presented to do a little scalping, the open board calls wound up with more noise than business. There was one lot of Newhouse sold at \$19.62%. Bingham Standard sold in the morning at \$150.00 and in the afternoon some one dropped Bingham Standard sold in the morning at the control of the first and in the afternoon some one dropped 100 shares, or pretended to, at 70c. At the finish 1,500 shares of Copper Glance changed hands at 25c, there being no early trading in the stock. Ohio Copper was sold at \$3.30, Ely-Witch went at \$1.07% and \$1.10, and Emma Copper dropped 500 shares at 40c. Ohio-Kentucky first sold to \$2.50 then at \$2.30 later at \$2.50. so'd at \$3.90. Ely-Witch went at \$1.674 and \$1.10. and Emma Copper dropped 500 shares at \$0. Ohio-Kentucky first sold at \$2.95. then at \$3, and later at \$2.95. Mason Valley again changed hands at \$2. Weimer Copper was first reported sold at \$2.50 and later at \$1.50 per share, with evidences that the laundrymen were at work Naildriver came out to a bid of 35c. Cedar Extension sold at 15c and Thompson at 25c.

McDonald Ely was offered all the way down the line from \$1 to 60c without a sale being made. The best bid for the stock was 51c. For Federal-Ely 69c was bid, but there were no offerings at any price.

Yerington Copper was offered, at 65c, Western Nevada Copper was quoted at \$1 @1.20, Wheeler Gold at 45c and Bingham Copper at 35c, while New Stockton was quoted at 45c3c and Eureka Swansea Extension at 1003c.

#### HIGGINSON LEASE MAKES FIRST SHIPMENT

One of the chief reasons for the resumption of strength in the demand for Jumbo Extension is the activity in Higginson leasing, which is operating on the Wedge claim of that company, says the Goldfield News.

Goldfield News.

The Higginson people made their first shipment of ore this week, or rather the first since the discovery which was made several months ago in the old workings of the company. The shipment comprised thirty-three tons and went to the Newada, Goldfield reduction works. prised thirty-three tons and went to the Nevada Goldfield reduction works.

As soon as the labor question is settled shipments will be made steadily from the new workings. The water can be pumped out in three shifts and then the large ore body will be attacked and shipped as rapidly as the rock can be brought to the surface.

ped as rapidly as the rock can be brought to the surface.

J. Davis, chief engineer of the Tonopah & Goldfield railway company, was in camp Thursday overseeing the laying of

#### THINGS ARE DOING AT HANNAPAH CAMP, NEVADA

Frank B. Work, who returned from Hannapah Wednesday, reports that there is much activity in that section, says the Tonopah Miner. The management of the Newhouse property at Hannapah is making arrangements to resume development work on an extensive scale. The big battery of boilers and a No. 3 Cameron pump have been installed, and the mine is now well equipped in every respect. The drift to the west on the 300, which is now in good ore, will be pushed out as rapidly as possible, and development work in other parts of the mine will be carried or systematically.

The Brock interests are actively developing their property at Silver Glance, three-quarters of a mile west of the Newhouse group, and have an excellent show-

use group, and have an excellent show-

made an important gold discovery less than a mile north of Hannapah and are opening up the big ledge which crops on the surface.

### Metal Markets.

Silver-66% per ounce. Copper (casting)-24% per pound. Copper (cathodes)-25c per pound. Lead-\$6 per 100 pounds.

#### Ore and bullion settlements in this city vesterday, as reported by McCornick & Co., amounted to \$126,090, as follows: Sil-

Ore and Bullion.

ver, lead, gold and copper ores, \$26,000; Mining Notes.

James Breen, the expert smelterman on the Heinze staff, left for Butte Tuesday The bid price on Alice in New York yesterday was \$4.25, Horn Silver \$1.50 and Ontario \$5.

James M. Kennelly, the Gold Springs operator, is up from camp on one of his periodical business trips.

Five cars of ore from Utah properties and four from Nevada were released from the Pioneer sampler at Sandy yesterday

There was released from the Taylor & Brunton sampler yesterday six cars of ore from Nevada, two from Montana, one from Idaho and twenty-three from Utah President David Keith, accompanied by

Captain Duncan MacVichie of the Heinze staff, are "doing" the Silver King properties at the Park. It begins to look as though the Heinze interests were preparng to play an important part at Park City W. H. Goss has left for Rosebud to be-

gin the pounding down of a fifty-foot shaft in the rich ledge of the Alps com-pany's property, where the big strike was recently made. There is four feet of fine ore to commence with and that a grea showing will be made during the next month is considered certain. Clarence Rooklidge, manager of the Wheeler Gold Mining & Milling company's properties in the Yerington region. Nevada, has been quite sick for several days, presumably with pneumonia. A message from his nurse yesterday conveyed the information that he was on the mend and would be all right in a short time.

It is rumored in the east that Walter Fitch, formerly general manager of the United States company's properties in this state, has been tendered the general su-perintendency of the Calumet & Heela mines. Mr. Fitch is now in th eeast, or on his way there, so there is no means

of verifying the report that emanates from Boston. Perry D. Delmas, superintendent of the Zenoli company's properties at Palisade, Nev., came in from camp yesterday morning. Owing to the heavy storms the roads have become absolutely bottomless and he has had to give up all attempts to haul ore to the railroad loading station, until supplies and wind relieve the tion, until sumshine and wind relieve th situation. He states that he is in a pe sition to ship regularly a good tonnag as soon as the roads will permit.

> J. OBERNDORFER, Stock Broker.

Tel. Bell 792. 161 S. Main St. SEVEN TROUGHS WONDER MIN-ING COMPANY. Considerable interest is being mani-

fested in a new property located in the Seven Troughs mining district, known as the Seven Troughs Wonder Mining company. This company owns and is operating a group of claims in the heart of the Seven Troughs district. and has for its neighbors such lamous JAMES A MURE mines as the Kindergarten, the Bad-ger and the Hills.

say returns show from \$40.00 to \$637.20 in gold, and indications are that it will be one of the largest producers.

A shaft ment conducted in connection with this be one of the largest producers.
